

### MINOR MINERAL INFORMATION

From the year 2003, the Department of Mining and Geology is carrying out minor mineral quarry mapping as per the suggestion of Public Accounts Committee. So far, the survey and digitization of data has been completed in 9 districts of the State namely, Thiruvananthapuram, Kollam, Pathanamthitta, Ernakulam, Idukki, Thrissur, Palakkad, Kannur and Malappuram district and in other districts the work is in progress. During the survey, data (both spatial and non-spatial) was collected by visiting each and every quarry (including abandoned, not working, seasonal, water logged, working etc.) and the data thus collected was fed into Mineral Information System software which is developed in-house. In the year 2006, the Department setup a GIS Laboratory as a part of GIS Project (Development of a Depository of Resource Planning and Management Capacity Building Spatial and Non Spatial Digital Data) sponsored by Kerala State Council for Science, Technology and Environment and in this project thrust was given for generation of spatial data of minor mineral quarries. It may be noted that in some district only mapping of the granite (building stone) quarries alone were carried out. In those districts, location of other minor mineral quarries has not been shown. As mentioned earlier, in some districts the mapping had been done many years back and hence the data found in the maps given below may not match with the present scenario. The Department is planning to update the data soon. It may be also noted that there are some gaps in data pertaining to Thrissur district.

The map as well as the list of quarries provided in this website include all quarries irrespective of their status ( working, seasonal, temporarily stopped, abandoned, abandoned and water filled etc.) at the time of visit. The data on owner of land, quarry operator etc. were collected by local enquiry and for those quarries which are abandoned in nature, the data were not cross checked /verified with Revenue Authorities as there were no further follow up action for such quarries.

All maps are given as pdf files which can be zoomed to get finer details.
